## FSX Performance Software

Experience the most realistic, educational and intuitive golf simulation you've ever seen with our industry-leading fitting and gaming software. Analyze shot data, improve your skills, or play the world's best and most exclusive courses in beautiful 4K resolution. Compete with friends in the same room or anywhere in the world via Foresight Sports' online network. Regardless of what you want to do, you'll enjoy the most complete, true-to-life game experience possible.

### 4K RESOLUTION

Seeing is believing. With a pixel resolution four times sharper than HD, you'll be equipped with the most accurate technology available for true-to-life golf simulation.

### ONLINE PLAY

Play a virtual foursome with golfers from anywhere around the world. With our online game play, the only thing better than enjoying your favorite courses virtually is the satisfaction of real-life results.

### BUILD YOUR SKILLS

Powered by true ball flight data, FSX software delivers a playing experience so realistic it actually improves your game, meaning your virtual game play experience will translate to better results on the real course as well.

### 'MY PERFORMANCE' COMPATIBLE.

As with every FSX software application, you can save your completed fitting data to your cloud-based profile for review and analysis later on, allowing you to continually measure your skill-building and growth.

## FSX Fit

Powered by the GC2 Smart Camera System, Foresight Sports' FSX Fit Module lets you analyze shot shape, compare club performance and perform comprehensive gap testing and analysis, while our Driving Range Mode, included in every package, provides perfect visualization of performance every time.

### Club fitting made easy.

FSX Fit makes club fitting easy and intuitive by providing a comprehensive virtual depiction of launch condition, shot shape and down range values - all in real time. Compare club performance via custom color tracing, review disperse and gap analysis, and when you're done, simply save and export your customers data for a club fitting experience unlike any before.

### Complete ball and club head performance data.

FSX Fit delivers a full spectrum of ball launch data, including tabularized shot data, illustrated shot shape, distance and dispersion. With HMT connected, fitters can also get a comprehensive depiction of club data, including club head speed, horizontal club path, smash factor, dynamic loft and lie - and even impact location.

'My Performance' Compatible.

## FSX Compete

Test your skills with our game- building challenges and see how you rank against others. Powered by the GC2 Smart Camera System, our FSX Compete Software delivers unmatched entertainment and skill-building value for players of every age and playing ability.

### Skills Challenge.

Develop your skills against others in a series of increasingly difficult challenges that include closest-to-the-pin and ball placement tests with our Skills Challenge feature. Final scores can be stored in your 'My Performance' page and ranked against other players online.

### Closest to the Pin.

Consistency is everything in our closest-to-the pin challenge, where you test your skills against others on a selected par 3 or the Foresight Sports range. Final results can be stored in your 'My Performance' page and ranked against other players online.

### Long Drive.

Power and precision become the focus in our long drive challenge, where you test your skills against others on a selected par 4, par 5, or the Foresight Sports range.

'My Performance' Compatible.

## FSX Play -1 course included (Teton Pines)

SEE NEXT PAGE FOR ALL AVAILABLE COURSES
